For Immediate Release

Facility Planning Update

Patrons have been asking questions about our plans for the future and a new or renovated building. In recognition of the current economic climate, the Board of Trustees has decided not to pursue a referendum until Spring of 2010, at the earliest. We continue to explore our options with the city and the school district. We are also continuing to study the option of expanding our current facility.

We hope to have informational sessions for feedback from the public beginning Summer of 2009. Watch for more information.
